

# Final Project:

Falling Apart (Working Title)

- My final project will consist of 6-8 videos, each on their own monitor
- The monitors will be installed in my studio in Fletcher
- Some of the monitors will be installed in a way to give the idea of personal space or privacy.. It might be that only one person can watch a video at a time

- 2-3 of the monitors/videos will be lined up and these videos will make a singular piece.. The 2-3 videos will be dependent upon one another
- These videos will be longer in length of the others and we wont need to watch them in their entirety for the final crit
- These videos will show part of the human form doing an action

# Video 1

# Video 2

# Video 3

# Video 4

- More videos to come!!
- Ideally I would like for all of the videos to be playing without the use of headphones, although as the installation is in a small room it might become a necessity
- Not all of the monitors will be exactly the same

# Inspiration for Installation Setup
